

American Express

Many merchants may wonder why they should accept American Express. American Express operates in 130 countries around the world. According to American Express, 24% of American Express Card members used only American Express in the past month and no other major credit or charge cards. Merchants that offer consumers the ability to pay with American Express have an advantage in expanding their customer base, increasing customer satisfaction, and increasing revenue.

Merchants' Choice Payment Solutions offers American Express processing to all types of industries and we can customize a solution for you.

Not only can MCPS provide you with payment solutions, but we also have unmatched service. Although we process merchant accounts nationally, you will have the feeling of localized, customized service to match your business needs. Unlike other payment processors, our **customer service** department is part of our company, on-site and working 24 hours a day, 7 days a week to ensure your payment processing runs smoothly during business hours. We have a team on hand to provide help at your most critical moments or when you just need to get a question answered. Merchants' Choice is here for you.

Merchants' Choice Payment Solutions makes adding payment processing options quick and easy. We also have a **full line of terminals** to support the payment options you need at the pricing you can afford.
