

Pay At the Pump

When driving up to a gas station, consumers expect the ability to pay-at-the-pump for their fuel or else they may choose another fuel station. Merchants in the Convenience Store/Gas Station Industry that offer consumers the ability to pay-at-the-pump have an advantage in expanding their customer base, increasing customer satisfaction, and increasing revenue.

Merchants' Choice Payment Solutions can enable your business to accept all of the major credit cards including Visa, MasterCard, American Express, and Discover, as well as Debit cards, EBT, Voyager, and Wright Express at the pump.

Not only can Merchants' Choice provide you with payment solutions, but we also have unmatched service. Although we process merchant accounts nationally, you will have the feeling of localized, customized service to match your business needs. Unlike other payment processors, our **customer service** department is part of our company, on-site and working 24 hours a day, 7 days a week to ensure your payment processing runs smoothly during business hours. We have a team on hand to provide help at your most critical moments or when you just need to get a question answered. MCPS is here for you.

Merchants' Choice Payment Solutions makes adding payment processing options quick and easy. We also have a **full line of terminals** to support the payment options you need at the pricing you can afford.
