

Scrip (ATM)

Scrip is a substitute for money in the form of negotiable coupons that can be used like cash to purchase products or services from merchants who have issued them. Customers use their pin debit cards with the scrip machine and instead of receiving cash; they receive a coupon to use within your store. The machine stands alone on your countertop or on the floor and does not require a cashier - it works like an **ATM** machine except that it does not issue cash, just coupons.

Merchants that offer consumers the ability to pay with multiple payment options, including cash coupons, have the advantage of expanding their customer base, increasing customer satisfaction, and increasing revenue.

Benefits of Scrip

- No maintenance of cash ATM
- Increase customer traffic
- Increase average purchase
- Lower operating costs
- Earn transaction revenue
- Streamline customer checkout
- Eliminate "bad checks"
- Improve customer service

Merchants' Choice Payment Solutions offers Scrip to all types of industries and we can customize a solution for you.
